

INSTRUCTIONS

WATCH THE
INSTALLATION VIDEO

Check that the door fits the frame properly. Excess friction or scraping between the door and frame can cut the line. **DO NOT USE** if corner of door scrapes against the frame.

Push the button and pull out **BOTH** lines. Release the button to lock the lines in place. ***Always extend and retract both lines at the same time or it will break.***

Place one line around each top door corner. Position the plastic tubing behind the corner.

Push the button to raise or lower the ZipnHang to the desired height.

The jumbo hook provides more hanging options. Screw in hook only a few turns. **Stop before it gets tight.**

WARNING: Keep away from young children. The lines could be a strangulation hazard.

ZipnHang holds up to 8 pounds.

Push the button while holding **BOTH** lines, to retract and return the lines for storage.
